To whom it may concern,

I have recently graduated with a master's degree from Michigan Tech in applied mathematics after completing a B.S. in physics and mathematics. Upon achieving this, I entered a Ph.D. program at the University of MN, but have since decided that this degree program did not fit my long term interests. While searching for career opportunities, I discovered your opening for an Applied Mathematician via your website.

I am looking to contribute to Boeing while utilizing my entire educational background. My undergraduate in degree led me to study applied mathematics due to a strong interest in underlying mathematical models in physical processes. Numerical methods then became one of my primary interests in my studies as a graduate. My education and internship have also honed my skill when writing technical reports. These communication skills have been further honed through teaching courses to undergraduates throughout my education.

My educational background in both mathematics and physics will allow me to approach positions with the technical skills required and a thorough understanding of the underlying physical assumptions. Furthermore, my teaching and educational experiences will allow me to effectively communicate with all audiences. Thank you for your time and consideration, and hope to hear from you soon.

Sincerely,

A handwritten signature in black ink that reads "Peter M. Solfest". The script is cursive and fluid, with the first letters of each word being capitalized and prominent.

Peter M. Solfest
